# THE HIGHEST LEVEL OF ACCREDITATION

**We are fully accredited to the strictest and highest industry standards.**

Our Accredited Response Center (ARC) holds **full accreditation to BS EN 50518:2019 with NSI Gold Certification, ensuring the highest level of industry recognition.** To provide you with the utmost peace of mind, we exclusively employ extensively **trained operatives who possess exceptional skills and expertise.**

With our BS 8484:2016 certification, we are **authorised to respond to the highest level of police response, supported by a Unique Reference Number (URN).** This certification empowers us to swiftly and effectively handle critical situations, ensuring the utmost level of security.

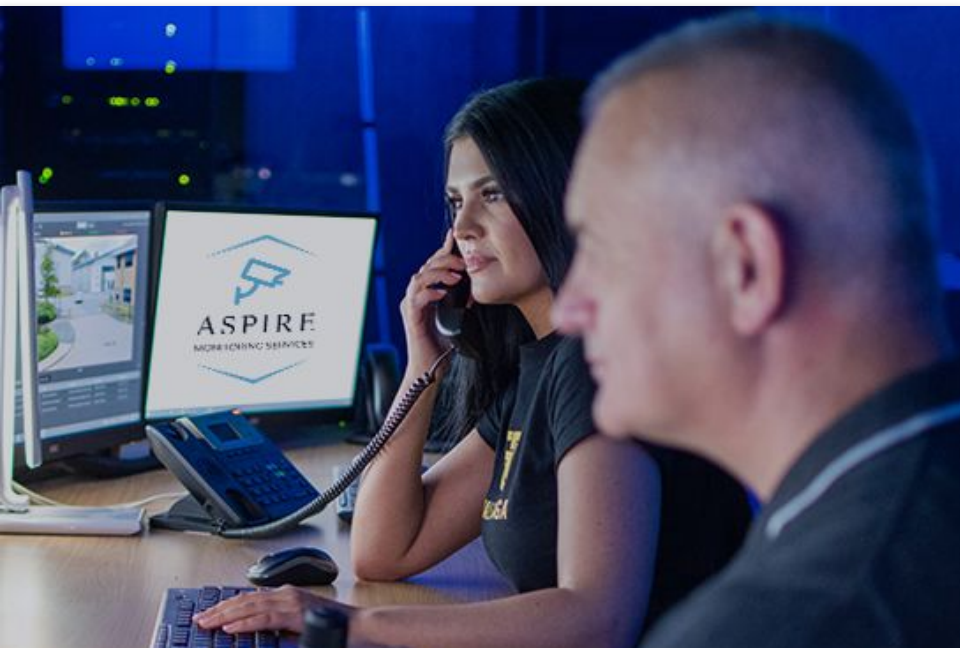

We maintain a comprehensive list of URNs for all UK police forces, granting us direct access to police control rooms without the need for a 999 call. This exclusive access **guarantees the fastest possible response time, further enhancing the level of security we deliver.**

Choose our company to benefit from our fully accredited ARC, highly trained operatives, and our ability to connect directly with police control rooms for rapid response in any situation.

# MISSION STATEMENT

## Why choose Aspire Monitoring?

At Aspire, we understand the importance of being different and catering to the unique needs of our clients. Here's why we stand out:

- **Experienced staff:** Our control room staff have over 40 years of combined experience in Alarm Receiving Centres, ensuring deep knowledge and understanding of our clients' requirements.
- **Personalised solutions:** We don't offer a "one size fits all" approach. We work closely with our clients to provide bespoke solutions for their specific needs and the needs of their end users.
- **Effective communication:** We maintain constant lines of communication with our clients, ensuring that our systems and response deliver exactly what is promised. We discuss reporting methods in detail to align with our clients' needs.
- **Meticulous attention to detail:** We prioritise meticulous planning and execution, focusing on customized solutions and exceeding expectations.

Choose Aspire Monitoring for tailored solutions, open communication, and exceptional service.

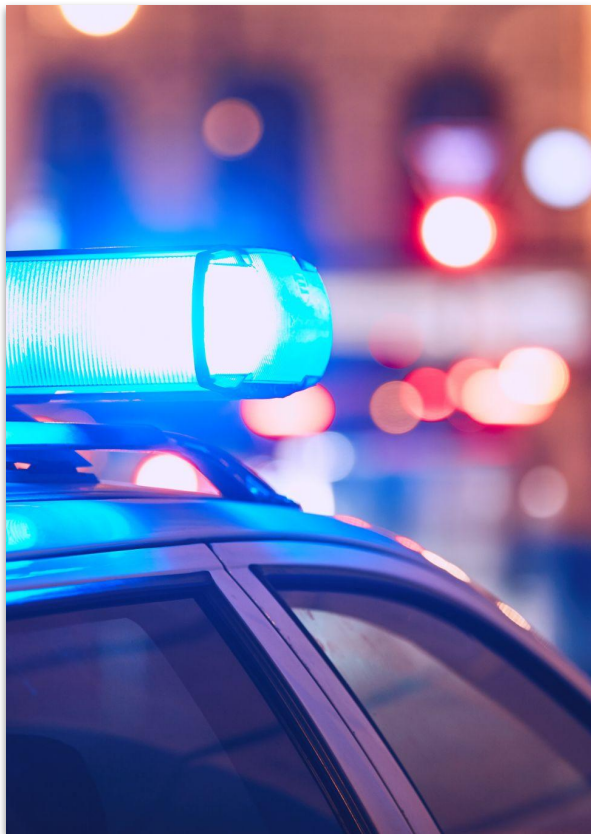

**We are dedicated to meeting your individual requirements and providing peace of mind.**

# CASE STUDY

## Case Study Ref. fitment of video alarm triggered CCTV system on Police Secure Vehicle Compound.

The site in question has a history of break-ins, which has become an ongoing issue due to the nature of the site and its contents. It serves as a Police Secure Vehicle compound, designated for the temporary containment of seized vehicles until Scene of Crime Officers (SOCO) can carry out their tasks. This means that vehicles may remain on-site for several days.

Criminal activity primarily revolves around individuals attempting to steal items concealed within the vehicles that have not yet been discovered by the Police. The items targeted by criminals range from drugs and cash to evidential items.

To address these security concerns, the site is enclosed and secured by a perimeter wall and a gate. CCTV cameras have been strategically installed to cover the areas of interest, with electronic trip wires set up on the Network Video Recorder (NVR) to monitor the tops of the walls and gate.

Internally, detection systems have been implemented in the main yard areas, and a tannoy system has been installed for added security measures. Shortly after the system was fitted, tested, and commissioned, there was another attempted breach by criminals trying to access the site to retrieve items from a recently impounded vehicle.

Aspire Monitoring Services is dedicated to enhancing the security measures at the site and ensuring the safety of the premises and its contents. During this incident, the CCTV system triggered alarm images of the criminals entering the area.

The RVRC operator immediately responded by calling the Police and informing them of visually verified criminal activity. The tannoy system was used, but despite its operation, the criminals persisted and managed to remove items from a vehicle.

The criminals eventually made their escape by scaling the site's wall and jumping into the road. However, by that time, the Police had arrived on the scene and were able to make arrests.

With the items recovered and the CCTV evidence, the Police were able to arrest and convict the criminals involved.

This incident has had a profound effect on the site's security. Since the incident and over a 12-month period, there have been no further attempts by criminals to access the protected area.

# OUR CLIENTS

Our clients include industry leaders and reputable organizations such as United Utilities, Greater Manchester Police, Kia, Ford, Network Rail, and many more. We have successfully partnered with these esteemed companies, delivering exceptional services and tailored solutions to meet their specific needs. Our track record of working with renowned brands speaks to our expertise and commitment to excellence.

# REFERENCE

## Rating 5

Renard Fire and Security are a long established Fire and Security integrator based in the North West.

Over the years we have used several different Monitoring stations, with mixed levels of success, on reviewing our Monitoring requirements, as a business, we decided to transfer our whole estate over to Aspire, due to their flexible approach and tailored service offering.

Since we started dealing with Aspire, we have found their service levels have exceeded our expectations, their flexible approach is a refreshing change to the historic monitoring stations we have used in the past.
